

Benchmark Indices

MySuper has been designed for members who don't select their own investment options. MySuper uses a combination of three investment portfolios depending on your age. These investment portfolios work together for you so that your balance in MySuper includes both growth investments (eg shares and property) and defensive investments (eg cash and fixed interest) that change in line with your age. For more information about our MySuper option, visit plum.com.au/mysuper

Notes:

¹ While the MySuper Growth and MySuper Conservative Growth portfolios have investment objectives that aim to achieve a return above the Consumer Price Index over either 5 or 10 years, another way to assess shorter-term performance is relative to their 'composite' benchmark return. It's called a 'composite' benchmark because it comprises multiple benchmark indices, weighted according to the benchmark asset allocation. The indices in the composite benchmark are shown above.

² The benchmarks for our multi-asset portfolios change infrequently. This table is only updated when a change to a benchmark is made.
